

Applications of CCM

Industry	End Uses
Agriculture	Animal nutrition, fertilizer & soil improvers
Environment	Waste-water treatment, treatment of contaminated soils, neutralisation of acids and pH control, flue gas desulphurisation
Flame Retardants	Plastics, insulated cables
Hydrometallurgy	Nickel-cobalt, copper-cobalt
Chemicals	Magnesium compounds
Foundries /Metallurgy	Steel fluxing
Industrial	Rubber, cement, food, toothpaste, pharmaceutical, & cosmetics, industrial fillers
Pulp & Paper	Sulphite pulp production, effluent treatment
Water Treatment	As a replacement for lime and for use in high purity industrial water production
